

Next level bathroom solutions

SHOWER DRAINS AND MORE

The modern era and lifestyle have inspired us to develop entirely new solutions in the bathroom equipment industry. The emergence of the WEBE brand is the result of our pursuit to meet the demands of the modern market and contemporary way of life.

Our focus lies in the production of linear drains and the continuous expansion of our bathroom equipment range. Our assortment includes a wide selection of models that are both technically and design-wise suited to meet the most demanding market needs.

An added value to our products comes from the knowledge base, technology, and other resources of the renowned German manufacturer of the same name, which has years of experience in designing and developing bathroom equipment.

The key to our strength lies in flexibility and expertise, aimed at a unique approach tailored to the specific needs of each partner and market.

The WEBE brand is a product of the global CMM Corporation, which operates across two continents through a network of member companies.

Manufacturing technology

Based on 10 years of experience in the shower drains industry worldwide and 2 years of R&D process we have decided to use the following technologies which give us solid ground for worldwide positioning.

Injection molding

Injection molding using high-quality modular molds ensures that each piece is identical and compliant with standards, while achieving high production capacities. Additionally, ABS and PP materials provide us with flexibility in terms of shapes, plumbing connections, and sizes, which was crucial in our decision to manufacture products from these materials.

Ultrasonic welding

When it came to achieving the perfect bonding of two plastic pieces, ultrasonic welding proved to be the most reliable and cleanest solution. This was one of the most critical technical challenges for us, which is why we decided to use the best machines available to ensure a 100% technically and aesthetically precise welding surface.

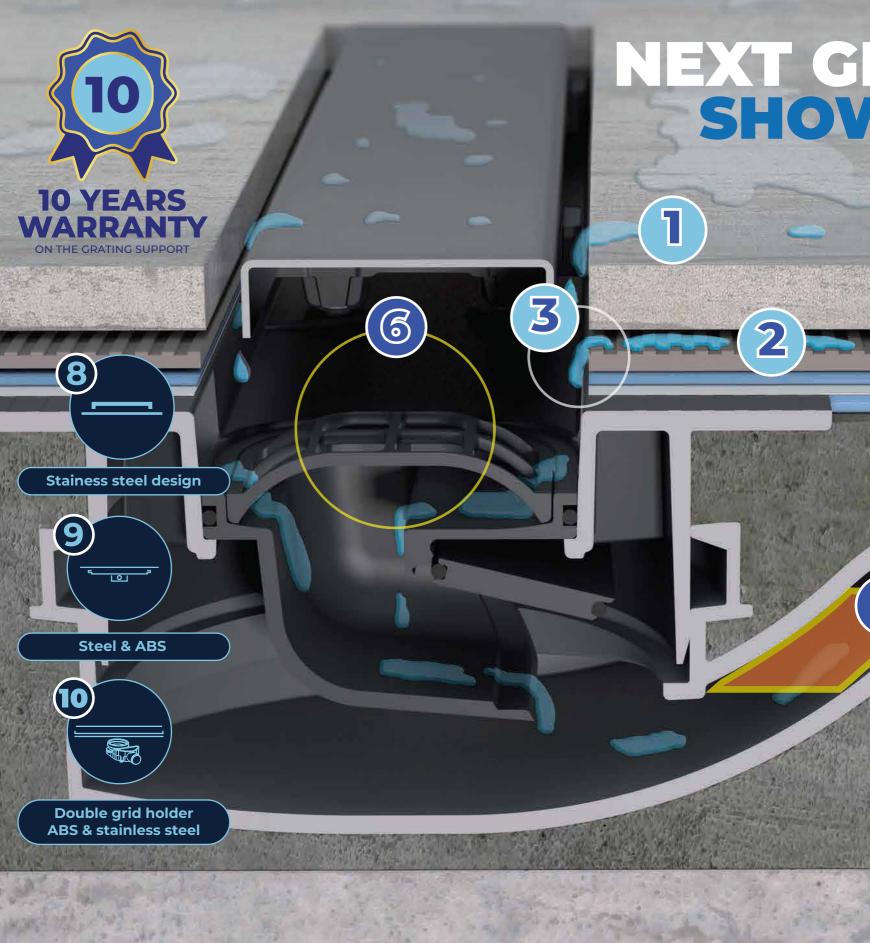

Laser technology

To simplify the cutting of metal parts as much as possible, we have chosen to exclusively use laser technology. Laser is used in all processes involving cutting, welding, and engraving on the stainless steel components of our products. Although this technology is more expensive compared to traditional metal shaping methods, it allows us to achieve a flawless finish on our products and ensures high production capacity.

Blister vacuum forming

Following the needs of our clients, particularly those from specialized stores and the DIY segment, we decided to invest in a vacuum forming machine. This now allows us to package all our products in transparent PET blisters, regardless of their size, shape, or color. Combined with ultrasonic welding, vacuum forming provides unlimited flexibility in packaging and displaying our products in retail environments.

Primary water coming

Secondary water under the tiles

Double drainage Grout cracking 1 - wet siphon

DOUBLE DONBIE

Next-generation draining system with superb improvements in the form of double siphon, double drainage and ultimate flow rate resolving all bathroom drainage-related challenges.

Grid height adjustable up to 25 mm fits any ceramic-marble tile

Stainless steel & ABS double durability standard

High flow rate 2x less cleaning

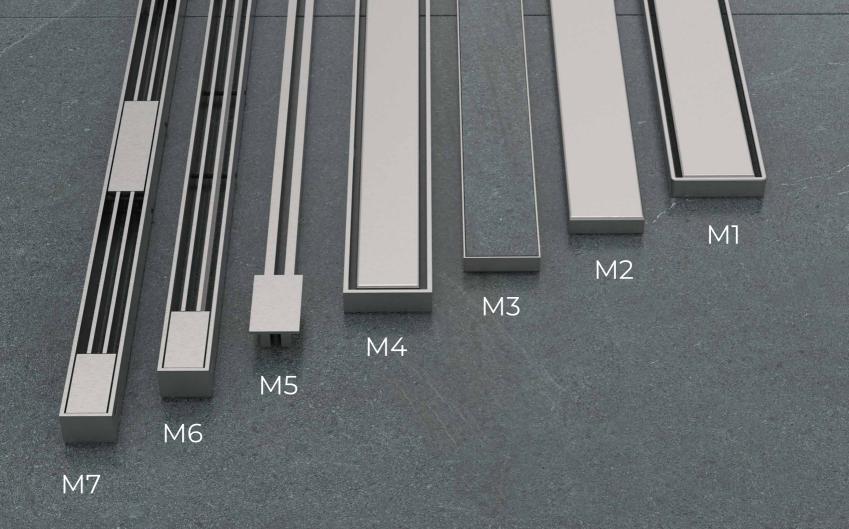

Double siphon

Double drainage

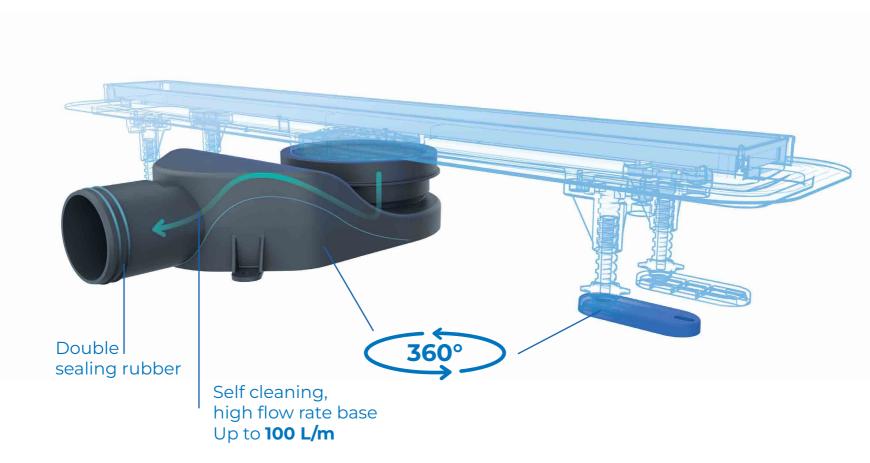

Refreshing design

We offer a wide selection of grating with various designs that meet both the technical and visual needs of our clients. Our models feature an integrated 2-in-1 reversible grating system, allowing you to easily change the design of your bathroom.

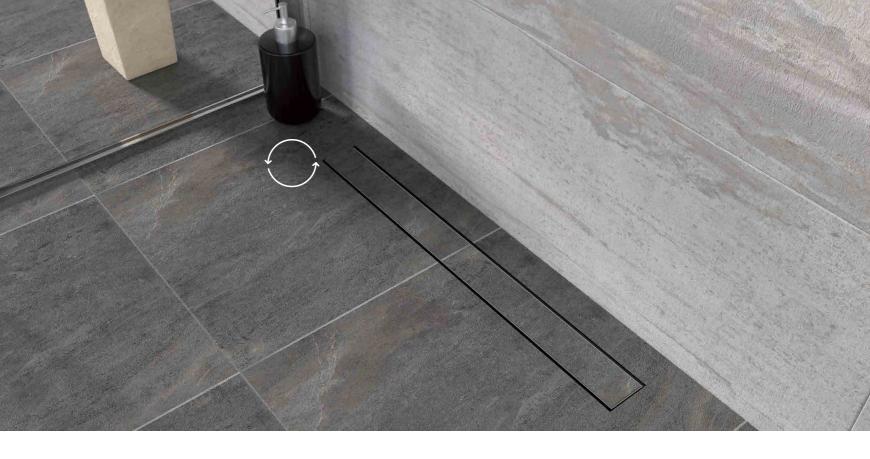

Welcome to the era of modern minimalism, where our grating is meticulously crafted to align with its principles.

Easy installation and maintenance

Considering the needs of both professional and end users, we decided to apply fundamental engineering principles to create a product that can be assembled in less than a minute, while also featuring high flow capacity and a self-cleaning siphon. These characteristics provide a unique advantage to everyone who uses our products and are incorporated into every model we offer.

WEBE DRAIN BASIC Main advantages

- Flow rate up to 100 l/min, 55 l/min (double siphon)
- **Double siphon** . Dry and wet combined.
- 58 mm installation height
- Two in one reversible grating
- Easy installation and maintenance
- Base rotation 360°

NEXT LEVEL BATHROOM SOLUTIONS

BRANDING OF PRODUCTS – OEM SPECIALIST

While creating the business model we aimed to use in order to maximize value for our factory, distributors, professionals, and end users in the short term, we decided to stay "behind the scenes" and fully leverage our strengths as well as those of our partners. We are focused on product development, production, and business growth for specific product groups on a global level. We utilize our global experience to create tailor-made solutions for each shareholder, partner, and specific market demand. Our partners leverage the strength of the brands they have developed and their expertise in sales and product distribution in each individual market. By combining these strengths, we create and add value for our buyers, professionals, and end users at a rapid pace.

STRATEGIC POSITIONING, SALES AND MARKETING SUPORT

We offer our partners consulting services for product positioning in specific markets, based on our ten years of experience in marketing and sales of bathroom equipment products. We have successfully established and implemented operations in over 40 countries across Europe, Africa, the Middle East, and India, giving us extensive knowledge of business development for this specific product. Our team consists of export managers, product managers, import-export specialists, graphic designers, SEO experts, and social media managers, all of whom are here to support the growth of our business collaboration at the highest level.

PACKING AND MARKING ON DEMAND

We offer several packaging options: branded boxes, PET blisters, and unlimited options for their design. Additionally, we can customize master packaging and product labeling according to the client's needs, ensuring that our partners have perfectly optimized solutions from the very beginning of our business relationship.

OEM POS AND DIGITAL MARKETING

Whether you need branded displays for showrooms, brand zones, shelves for DIY stores, or individual displays – we have it all. We have prepared solutions for this market segment, and all you need to do is choose what suits you best; we can deliver it with the first shipment, which includes complete branding in the language of your country. We also offer design and printing services for catalogs, flyers, and promotional materials under your brand, ensuring that sales outlets are equipped with all the necessary materials for promotion and sales.

PRODUCT DEVELOPMENT

The WEBE brand has a team of industrial and mechanical engineers specialized in working with plastic, stainless steel, and wood. This means that anything that can be made for a bathroom using these materials, we can create together with our partners who specialize in these materials. We are open to all ideas and possibilities, so you can be confident that you have a trusted partner in WEBE – an expert in bathroom solutions for your new project.
